

# גלאי וילון חיצוני לטווח יעיל 12 מטר

Due to its small size is particularly suitable for the protection of doors, windows and store fronts, and thanks to the materials used and technology evolved, it can be used in any outdoor installation where it is necessary protect well-defined areas (windows, doors, walls). It create a barrier like a curtain (about 7.5 °) and has an adjustable flow up to 12 mt. It's made of materials waterproof and the case is completely watertight. Furthermore, the electronics is subjected to a process of sealing to ensure the correct operation in all conditions of humidity and temperature. Still, the accurate design and analysis digital signals from the microwave make it very stable and immune to false alarms. Works with universal receiver Art. 9424/868

Art. 9456UT	
Operating Voltage	Lithium battery pack 3.6 - 1 Amp
Battery Life	3 years - 60 alarms day
MW Frequency	24,15 GHz
Coverage	12m Vertical Lobo 80° - Horizontal 7,5 °
Radio frequency	868,300 Mhz
Reports	Sabotage alarm, low battery and supervision
RF immunity	To 2 GHz
wizard in temperature	-
Operating temperature	-20C° to 55C°
Bracket	Supplied
Dimensions	37 x 125 x 40mm
